

MEDICAL UNIVERSITY OF THE AMERICAS

CLINICAL MEDICINE BOOKLIST

2010

Great care has gone into selecting and recommending texts that are appropriately written to the level of a clinical medical student, reflective of nationally recognized educational guidelines and objectives, clearly preparatory for North American licensing examinations (MCCQE and USMLE), and relatively inexpensive.

GENERAL – Suggested Global References for student physicians:

Toronto Notes for Medical Students 2010 (Paperback)

- By: Simon D. Baxter, Gordon G. McSheffrey
- Publisher: Toronto Review Notes; 25th edition (February 2010)
- ISBN-10: 0980939720 ISBN-13: 978-0980939729

A concise and comprehensive 1400-page review of 29 medical specialties, the University of Toronto graduating medical class, under the guidance of faculty specialists, revises each chapter of this book annually. The original goal was to prepare graduating students for the Medical Council of Canada Qualifying Examination. Over the past 24 years, however, it has become an essential study guide for medical students at all levels, as well as a guide for USMLE Step 2.

How Doctors Think (Paperback)

- By: Jerome Groopman
- Publisher: Mariner Books; Reprint Edition (March 2008)
- ISBN-10: 0547053649 ISBN-13: 978-0547053649

Jerome Groopman, a physician at Harvard Medical School who is also a writer for the New Yorker, does not debunk the notion of medical "exceptionalism." His book contains all kinds of smart, often selfless, occasionally heroic doctors making good decisions and sometimes saving lives. But it is far from a narcissistic paean to his profession. It is an effort to dissect the anatomy of correct diagnosis, successful treatment and humane care – and also of diagnostic error, misguided therapy and thoughtless bedside manner. His task is to offer practical advice to both patients and physicians. He succeeds at both.
